BETTER INFORMATION FOR **BETTER DECISIONS**

The Toro® Lynx® Central Control System was developed specifically to help you address the unique challenges and changing priorities you face every day.

With Lynx, you can now have all of your essential irrigation information readily available in one place, conveniently combined into a single, intuitive interface.

Easy to Set Up

Lynx® was developed for quick setup – it gives you a fast, accurate way to setup your system to put water exactly where you want it, and then allows you to make edits as your course conditions change.

Easy to Use

Lynx® has a distinct user interface that combines all essential data and intuitively presents the information you need (alerts, scheduled watering and more) at a glance. It's easy to access all the information you need with one click through your Favorites Menu.

Easy to Control

Lynx® empowers you to take quick, accurate action to effectively control and manage your golf course by providing past, present and future course information from multiple sources into a single, intuitive interface.

Support available 24/7 with NSN®

Toro's exclusive National Support Network provides software and network assistance from experienced service professionals who understand what you need. Now also through our dedicated smart phone or tablet apps.

Available anywhere, anytime.

LYNX gives you the ability to access your irrigation controller from anywhere - simply and securely! Now also through our dedicated smart phone apps.

The Lynx System helps you to:

- Optimally **manage** your water and resources
- Find more **time** in your day for other tasks
- Maximize your course **playability and aesthetics**
- Control your **costs** for water, utilities and labor

Dynamic pulldown to hide/show course name.

Dynamic drilldown by area, for quick overview.

The color of the water drop tells you if it's going to irrigate or not.

Simple menu with all functions.

Save the most important pages in favorites for quick access.

Dynamic tabs to hide/show open folders.

Decide which days of the week you are going to turn on sprinklers.

Easily edit your course map or create your own interactive map.

Imagine ALL your irrigation information at your fingertips. Lynx: redefining Ease and Efficiency to the next level.

Superior course map editing and creation

The advanced functionality of the Lynx® Central Control System enables you to **edit your course map easily, or create your own fully interactive map** using a digital image of your course. Setting up your map is simple, and Lynx® lets you **program and control your irrigation activities right from the map**, with instant access to operation feedback from the rest of your irrigation system.

Easily set up and customize your irrigation system

Because course managers insist on easy-to-use software, the Lynx® Central Control System was developed for **quick setup and operation**. Lynx® was designed by Toro to reflect the input and preferences of the individuals who would be installing and using it.

Unsurpassed integration with other system components

Lynx® offers unequalled integration with other turf management components, giving you access to all of the information needed to support your irrigation management. Lynx can be seamlessly integrated with field hardware, pump stations, weather stations, electrical systems, smartphones and much more, including the Toro® Turf Guard® Wireless Soil Monitoring System.

Comprehensive reporting increases your productivity

Armed with the thorough reports provided by Lynx, you'll be able to **immediately address any irrigation concerns and avoid potential course damage** . . . or just move on to other tasks when Lynx lets you know that things are running as planned.

- ✓ The interactive map layer can be quickly created using any digital image for the background,
- ✓ Easily add, drag, drop and assign sprinklers, satellites, Turf Guard® wireless soil sensors and switches to their precise locations within the map's irrigation layer.
- ✓ Easily designate pre-set or customized water distribution based on entire areas of your course, specific holes or individual sprinkler heads.
- ✓ Real-time amperage and voltage tests.

- ✓ A comprehensive Course Report function supports your scheduled irrigation by providing system status information, even on manual watering activities.
- ✓ Lynx® auto-generates reports after each night's watering, so you can quickly confirm all sprinkler runtimes at a glance.

Field Control Systems that integrate seamlessly with Lynx

TORO FIELD CONTROL SYSTEMS

Toro is the leading golf irrigation company in the world and provides an array of field control options

Lynx Smart Satellite

Satellite systems use controllers placed on each hole to operate a specified number of stations.

- ✓ Watering by the second reduces waste and improves watering precision.
- ✓ Future upgrades can be accomplished with advanced satellite firmware, keeping you current with technology.
- ✓ Amperage reading at the sprinkler solenoid to completely monitor the sprinkler.
- ✓ Satellite upgrade kits enable older Toro satellite units to be upgraded very cost effectively vs. a complete system change-out.
- ✓ Easy to manage and troubleshoot from each unit.
- ✓ Hardwire and 2-way radio communication options allow for easy installation and maintenance.

Advanced 2-Wire Control

2-wire systems replace satellite boxes with intelligent modules installed near or on the sprinklers. These modules are all connected to the central computer by a simple two-wire conductor cable. The elimination of satellite boxes and the thousands meters of wire simplifies the installation, improves aesthetics and reduces cost.

- ✓ Continuous Two-way Communication
- ✓ Real Time Diagnostics and Voltage Tests
- ✓ Best-in-class Broadband Lightning Protection
- ✓ Vandal and flood resistant
- ✓ Allow for system expansion by tapping into the cable.

The Lynx[®] Central Control System offers unequalled integration with Toro's Field Control Systems, enabling you to have the complete information needed to support your irrigation decisions.

INFINITY™ SERIES GOLF SPRINKLERS

Engineered for Today's Challenges.
Designed for Tomorrow's Technologies.

The INFINITY™ Series improves your course quality with less workload and most important, it keeps players playing. Calculate the money you'll save by cutting sprinkler maintenance from hours to minutes.

Smart Access®

Provides top accessibility to all critical components.

- ✓ No digging or unsightly turf repair scars
- ✓ Customizable marker
- ✓ No buried wire splices or ground faults
- ✓ Replaceable cover if damaged
- ✓ Pilot valve removable with water "ON"
- ✓ Increased labor efficiency
- ✓ Lower long term cost of ownership

2-wire module

Accessible from the top allows for module retrieval, system troubleshooting and system repairs without digging!

TruJectory™

Adjustment of the Main Nozzle—24 Positions from 7°-30°

SMART ACCESS compartment offers room for a decoder module, wire splices and all the room to grow in the future.

FLEX 800™ SERIES GOLF SPRINKLERS

Golf sprinklers with all the efficiency and proven performance features and benefits of the 800S and DT Series

TRAJECTORY ADJUSTMENT
In 24-position Tru-Jectory or Dual trajectory to help fight the wind, avoid obstacles or to reduce the radius.

NOZZLE BASE CLUTCHING
Hot spot watering has never been easier, simply turn, hold and shoot to put down as much water as needed.

LARGE NOZZLE SELECTION
From 6,0m to 30,5m (20' to 100') we've got you covered! Only Toro provides the flexibility to optimize your system for maximum uniformity.

PART AND FULL CIRCLE MODELS
Align part circle quickly and easily or adjust watering locations to suit seasonal needs.

Toro is always there to help you care for your landscapes the way you want,
when you want, better than anyone else.

Count on it.
